

ABSTRACT OF THE DISCLOSURE

Sub A1

A system and method for combining ToL/PBX system is provided whereby a single policy may be enforced for both TFA and ToL users by making the H.323 gatekeeper (103) aware of those TFA connectors so as to accurately allocate the remaining available bandwidth. According to
5 embodiments of the invention, the H.323 gatekeeper (103) is at least notified whenever a TFA call is being made or received.
